

DIESEL FUEL PRODUCTS

PREMIUM ULS DIESEL BOOSTER (Part # 009)

Improves fuel economy, increases overall engine performance, augments proper exhaust functionality and minimizes engine wear.

- Dramatically improves lubricity to provide increased power and enhanced fuel economy
- Extends Diesel Particulate Filter (DPF) life and reduces untimely DPF regeneration cycles by minimizing soot and ash buildup in the exhaust system.
- Utilizes advanced anti-oxidant technology to extend diesel fuel longevity by improving thermal and oxidative stability in all diesel types.
- Contains a cetane enhancer that boosts performance up to 5 numbers to provide a quicker burn and more complete combustion to reduce exhaust emissions.
- Substantially reduces injector failures in all diesel engines by adding deposit control additives and detergents that improve diesel fuel quality and enhance injector deposit control.

DIESEL INDUCTION BUFFER & FLUSHING AGENT (Part # 024)

Applied through the air intake, EGR and DPF with a high pressure atomization tool, that neutralizes and restores the induction system.

- Neutralizes and restores the induction system.
- Safe for catalytic converters, oxygen sensors, DPF's, EGR valves and EGR coolers.

DIESEL INDUCTION & EXHAUST CLEANER (Part # 020)

Cleans particulate matter and combustion by-products from the air induction and exhaust system.

- Safely cleans the EGR valve, EGR cooler, DPF & DEF back to OEM specifications.
- Significantly decreases harmful emissions.
- Reduces untimely and costly DPF regeneration cycles.
- Extends the life of the entire exhaust system.

EQUIPMENT

THE FORTE EXHAUST ATOMIZER (Part # DPF99)

The Forte Exhaust Atomizer is a tool that induces an atomized chemical spray into the DPF to remove soot and particulate matter from the filter.

- With the tool there is no need to remove the DPF as the Forte Exhaust Atomizer allows you to easily service the DPF through a temp. sensor
- The service can be completed in less 1 hour and requires a regen after the Diesel Induction Cleaner has been induced into the DPF.
- The equipment is very easy to use and is transportable. It fits into a toolbox when the service is complete.

EQUIPMENT CONT.

COOLANT EXCHANGER (Part # RCS541)

The Coolant Machine completely removes contaminated engine coolant while simultaneously refilling the cooling system with new coolant.

- During exchange process, engine is not running.
- Completely removes contaminated engine coolant.
- Old coolant is exchanged in just a few minutes.
- No messy spills.
- Eliminate air locks.
- Compact design.

TRANSMISSION FLUID EXCHANGER (Part # ATS330E)

It calculates the total flow of the used ATF fluid being pumped out from the transmission and simultaneously pumps in the exact amount of new ATF fluid into the transmission.

- Micro-processor controlled with keypad.
- Matches the flow of transmission resulting in extremely fast fluid exchange (approx 3-10 min)
- Unique cleaning/auto exchange feature.
- Easy to drain oil pan for filter change.
- No valves or flow regulators to adjust.
- Pressure diagnosis of transmission.
- Visual confirmation of fluid exchange.

POWER STEERING FLUID EXCHANGER (Part # PSF214)

Designed to flush out the old contaminated fluid and replace it with new power steering fluid.

- Quick exchange (approx 35 seconds)
- Improves lubrication.
- Reduces component wear.
- Cleans entire system of contaminants.
- 12 volt DC system.

DIESEL FUEL SYSTEM, EGR, & DPF SERVICE (Part # DFS920)

A fast and efficient versatile machine that connects to all diesel systems to thoroughly clean and eliminate EGR deposits.

EGR, Induction and Combustion Service:

- Thoroughly cleans and eliminates EGR deposits.
- Removes carbon build up from EGR cooler and induction system.
- Avoid costly tear-down of EGR manifold system.
- Avoid replacement of contaminated EGR cooler and valve.

Diesel Particulate Filter Service:

- No need to replace or remove the DPF filter.
- A specially formulated product is sprayed through the intake or directly in the exhaust to completely clean the DPF filter.
- No danger of knocking or run away engine

OTC DEPOSIT CONTROL STATION (Part # 7448)

Is a unique tool designed to clean the combustion chamber and fuel injection system of a gasoline vehicle.

- Cleans deposits from intake valves, fuel injectors and combustion chambers.
- Restores lost power.
- Improves fuel economy.
- Operates on shop air.
- No aerosol cans required.

Forté Performance Systems offers state-of-the-art preventative maintenance Performance Products allowing you to maximize workmanship and profits while offering superior consumer benefits.

In addition, Forté carries a comprehensive line of Fluid Maintenance Equipment allowing you to provide fast, efficient services and maximum protection for today's sophisticated automobiles.

PERFORMANCE PRODUCTS

Products so good you have to be licensed to use them.

www.fortesystems.ca

OIL PRODUCTS

FUSION+ OIL TREATMENT (Part # 001FS)

Boosts oil to synthetic like performance by increasing viscosity control.

- Reduces harmful emissions while enhancing deposit control and stabilizing viscosity through improved thermal stability.
- Provides excellent anti-oxidant & anti-wear properties.
- Reduces sludge build-up to prolong oil life.
- Boosts engine oil towards synthetic like performance.

PRE-LUBE SERVICE (Part # 005)

Safely removes sludge and varnish deposits from the crankcase.

- Provides improved engine performance by removing all varnishes and sludge that have been created within the crankcase by the regular operation of the vehicle.
- Safely removes crankcase sludge and varnish to free sticky piston rings.
- Helps reduce oil consumption.
- Reduces hydrocarbon and nitrogen oxide emissions.
- Cleans the entire crankcase and allows the new oil and filter to function without any restrictions.
- After completing the motor flush, the new oil will be able to provide increased horsepower, enhanced emission control and improved fuel economy.

GASOLINE PRODUCTS

FUEL SYSTEM CLEANER (Part # 012)

Improves fuel efficiency by cleaning and lubricating the fuel system.

- Removes intake valve deposits and helps reduce harmful emissions through the use of an intake valve deposit control agent.
- Contains a fuel stabilizer that prevents fuel from degrading and oxidizing over time.
- Minimizes fuel tank corrosion by emulsifying and purging any moisture that is present in the vehicles fuel system.
- Optimizes injector spray pattern by dissolving fuel varnish build up on the injector tips

GASOLINE DIRECT INJECTION & COMBUSTION CHAMBER SERVICE (Part # 003)

Reduces carbon and varnish build up in the combustion chamber area.

- Promotes stabilized compression, smoother idle and improved fuel economy by helping to clean the ignition area, that if left untreated will negatively impact the combustion process.
- Helps decarbonize piston crowns and cylinder heads to remove knock (ping) and engine run-on.
- Reduces hydrocarbon, nitrogen oxide emissions, and helps control and reduce intake valve deposits.
- Cleans the combustion chamber area, reducing the need for higher-octane fuels.

CB30 CARBON BLASTER (Part # 542)

Promotes cleaner emissions and restores lost power.

- Cleans restricted injectors, removes gum and varnish from fuel rails.
- Cleans carbon from intake valves and oxygen sensors to restore engine performance.
- Improves vehicle performance and reduces emissions.

PROFESSIONAL USE AEROSOLS

AIR INTAKE CARB & CHOKE CLEANER (Part # 036A)

Safely cleans and removes varnish build up in the air intake system.

- Air Intake Carb & Choke Cleaner cleans the entire air plenum, decarbonizes piston crowns and reduces intake valve deposits, resulting in superior engine performance.

F 100 SPRAY (Part # 014)

Multipurpose friction reducing, corrosion protecting universal lubricant.

- Substantially reduces friction and displaces moisture.
- Contains extreme pressure and anti-wear properties in order to increase equipment life and reduce downtime.
- Quickly penetrates any surface and protects metal surfaces from corrosion.
- Can be used on electrical components to keep electrical systems dry and eliminate short circuits.

NON-CHLORINATED BRAKE CLEANER (Part # 015A)

Powerful cleaner that blasts away grease, oil, and dirt.

- Effectively removes brake fluid, grease and oil.
- Environmentally friendly non corrosive fluid that dries quickly and does not leave any residue.
- Remove contaminants from brake parts without disassembling.
- Effective on constant velocity joints as a degreasing agent.

TRANSMISSION PRODUCTS

AUTOMATIC TRANSMISSION & ENGINE SEAL CONDITIONER (Part # 006 & 006WS)

Multipurpose oil that helps stop leaks, condition seals & reduces friction.

- Engineered to restore the elasticity and size to transmission seals and O-rings.
- Improves transmission fluid effectiveness during heavy loads, stop-and-go driving conditions or in vehicles equipped with air-conditioning.
- Contains excellent multi functional anti-wear additives that help reduce wear and improve friction modification.

*Also available for WS ATF

AUTOMATIC TRANSMISSION CLEANER (Part # 006A)

Removes harmful sludge & contaminated fluid from the transmission.

- Automatic Transmission Flush removes harmful varnish, sludge and contaminated fluid from entire transmission to restore and prepare the transmission environment for new oil.

DIFFERENTIAL & GEAR TREATMENT (Part # 004)

Provides improved wear protection against viscosity breakdown.

- Improves performance levels of GL5 and MIL PRF2105E lubricants.
- Reduces gear box noise, heat and friction
- Delivers excellent shear stability and wear protection in differentials and gear box.
- Improves fluidity in cold temperatures, increase lubricant film strength and lowers pour point.

A/C PRODUCTS

AIR PURIFICATION SERVICE (Part # 016)

Improves the in-car air quality and restores the A/C system to its optimum operating condition.

- Removes allergens, mold and bacteria.
- Cleans and refreshes the evaporator coils and cavity.
- Remove dirt, debris and odour causing contaminants
- Ensure proper operation of air conditioning system.

COOLING SYSTEM PRODUCTS

COOLING SYSTEM FLUSH (Part # 007)

Safely removes rust and scale from the entire cooling system.

- Restores the cooling system's designated capacity, safeguarding against overheating, while maintaining proper coolant flow and heat transfer.
- Protects and extends the cooling system life, allowing proper ambient temperature readings which contribute to better fuel economy and performance.

COOLING SYSTEM CONDITIONER (Part # 010)

Lubricates and protects the cooling system against corrosion.

- Protects aluminum components from corrosion, electrolytic action and premature cavitation erosion.
- Is compatible with most antifreeze/coolant solutions including long life ethylene glycol.
- Stops scale and rust formation.
- Contains high molecular weight water soluble polymers that lubricates the water pump seals

POWER STEERING PRODUCTS

Power Steering Fluid & Sealer (Part # 041) Clear & Red

Provides excellent wear protection.

- Prevents system leaks and reduces noise.
- Conditions Power Steering seals and improves steering response and feel.
- Revitalizes seals to prevent seepage for longer component life of pumps, rack and pinion gears, seals, cylinders and valves.

Power Steering Rack & Pinion Cleaner (Part # 040A)

Designed to safely clean all sludge, deposits and contaminants

- The cleaner suspends deposits that have built up in the power steering oil and allows the contaminated oil to be flushed out completely, leaving a clean system.
- Helps extend power steering life.

PROFESSIONAL USE KITS

AUTOMATIC TRANSMISSION FLUSH KIT 066A OR 06WS6A

Removes sludge and varnish deposits, resulting in a noticeable change in shift feel and increased component life.

- Automatic Transmission Cleaner
- Automatic Transmission & Seal Conditioner

*Also available for WS ATF

POWER STEERING RACK & PINION KIT 40,41

Reduces hard steering during initial cold start-up and removes contaminated fluids. Restores seal flexibility and reduces fluid seepage due to shrunken seals.

- Power Steering Flush
- Power Steering Fluid/Sealer

EMISSION KITS

Designed to maintain upper and lower engine cleanliness. Promotes compliance with the most stringent environmental guidelines and restores performance.

EMISSION KIT 3512

- Combustion Chamber Cleaner
- Pre-Lube
- Fuel System Cleaner

EMISSION KIT 312

- Combustion Chamber Cleaner
- Fuel System Cleaner

INDUCTION KITS

Cleans air plenum, eliminates hesitation, decarbonizes piston crowns and reduces intake valve deposits resulting in superior engine performance. An essential service for solving driveability or performance problems.

INDUCTION KIT C363

- Combustion Chamber Cleaner
- CB30 Carbon Blaster
- Air Intake Carb & Choke Cleaner

INDUCTION KIT C3612

- Fuel System Cleaner
- CB30 Carbon Blaster
- Air Intake Carb & Choke Cleaner

COOLING SYSTEM KIT 710

A superior flushing compound that safely removes scale, rust and silicate deposits. Protects heat sensors and installs a color-coded pH balancer to give maximum protection.

- Cooling System Flush
- Cooling System Conditioner
